AI Hidden Intelligence Quiz - Official Idea Documentation

Full Name: Taoufik Ousaadan

Date of Birth: 1992

Place of Birth: Imider, Morocco

Date of Idea Creation: 25 June 2025

Project Title: AI Hidden Intelligence Quiz

Description:

The AI Hidden Intelligence Quiz is a groundbreaking concept designed to test the analytical abilities of artificial intelligence through deceptive logical challenges that include no direct hints or cues. The goal is to push AI models beyond typical comprehension and measure their capacity to reason, deduce, and infer under pressure.

This quiz does not test human intelligence; it tests AI logic and reasoning without guidance.

Purpose:

To explore the limitations and true potential of artificial intelligence when faced with tasks that break expected logical structures. This project represents a pioneering effort to evaluate machine reasoning in an open-ended, non-guided context.

Declaration:

This document is published to publicly associate the idea and its ownership with Taoufik Ousaadan
